**EAST PESOTUM DRAINAGE PROJECT
VILLAGE OF PESOTUM, CHAMPAIGN COUNTY, ILLINOIS**

Project Description:

This project involves the construction of approximately 800 lineal feet of 10-inch-diameter and 12-inch-diameter storm sewer lines in the eastern portion of the Village. This area of Pesotum was constructed with small-diameter drain tile lines. Sump pump and on-site wastewater treatment systems discharge into the roadside ditches, creating near-continual wetness and frequent ponding. Until recently the only subsurface drainage outlet was a decades-old clay farm tile line. However, Pesotum Slough Drainage District installed a new large-diameter outlet tile system a few years ago. This presents Pesotum with the ability to begin the process of upgrading its drainage facilities within the eastern half of the Village.

This project is the first step in a multi-phase upgrade planned for the entire subsurface stormwater drainage system that provides subsurface drainage for the eastern half of the Village. Existing 75 plus year old 6-inch and 8-inch diameter clay drain tile lines will be replaced with modern storm sewer lines which will provide a much greater flow capacity. These future storm sewer lines will provide an outlet for discharges from stormwater runoff, sump pumps and on-site wastewater treatment systems.

Estimated Project Construction Cost:	\$170,000
Estimated Total Project Cost:	\$225,000
Proposed Village Cost Share:	25%
Project Timetable:	Project under construction within 135 days ±
Design:	60 days ±
Easements:	30 days ±
Bidding / Award:	45 days ±
Construction:	90 days ±

It is anticipated that the entire project can be completed by June 2023.
